octiga

Deliver Microsoft 365 security in clicks, not weeks.

Microsoft 365 security is challenging, complicated, and very time-consuming. Octiga solves the challenges MSPs face by delivering a holistic security posture-as-a-service. Its multi-tenant dashboard is a single place for a complete security journey, allowing you to protect, detect, and remediate risks across all your clients.

Key features

- **Best practice baseline templates**

- **Significantly cut support time**

- **Gap analysis and risky configuration remediation**

- **Breach detection and alerting**

- **One-click remediation**

- **Incident response with prioritisation**

- **Latest PSA integrations**

- **Client reports and proof of service**

Why partner with Octiga?

Entirely cloud-based, Octiga only requires a one-time secure one-click sign-in using Microsoft 365 credentials. MSPs can deploy and maintain best practice baseline configurations and remediate Microsoft 365 breaches linked to your client's business, data and employees, devices, processes, email, sharing, data storage, and remote access.

Octiga delivers a complete Microsoft 365 security journey and has proven to be a fast and reliable SaaS automation solution that fits MSPs' clients' unique needs. It continually demonstrates the ability to reduce the risk and impact of client breaches, resulting in reduced costs and ultimately increased client retention.

Challenges Octiga solves

Microsoft 365 security monitoring, reporting, and remediation are notoriously difficult to manage and take time. Octiga solves this, providing coherent security posture automation, management, and monitoring for MSPs in just a few clicks.

Opportunities for MSPs

Managing Microsoft 365 for a single organisation is a difficult task. Having to manage multiple clients' Microsoft 365 is nearly impossible. Through Octiga, MSPs can free up engineering time and ensure continuous security best practice.
